

Contents Volume 26 1990

CONTENTS Volume 26 No. 1 1990

Regular papers

Yamashita, T., Kobayashi, T., Morita, Y. and Shoji, T.: The roles of weak light, oxygen and dithiothreitol in the photoreactivation of the oxygen evolving center of tris-washed and 2, 6-dichlorophenol indophenol-treated chloroplasts. <i>Evidence of the weak light needed for stimulating chloroplast electron transport in the reactivation of the O_2-evolving center</i>	1
Salahas, G., Manetas, Y. and Gavalas, N.A.: Effects of glycerol on the in vitro stability and regulatory activation / inactivation of pyruvate, orthophosphate dikinase of <i>Zea mays</i> L.	9
Pfündel, E. and Baake, E.: A quantitative description of fluorescence excitation spectra in intact bean leaves greened under intermittent light	19
Koenig, F.: Shade adaptation in cyanobacteria. <i>Further characterization of Anacystis shade phenotype as induced by sublethal concentrations of DCMU-type inhibitors in strong light</i>	29
Causgrove, T.P., Brune, D.C., Wang, J., Wittmershaus, B.P. and Blankenship, R.E.: Energy transfer kinetics in whole cells and isolated chlorosomes of green photosynthetic bacteria	39
Araus, J.L., Brown, R.H., Bouton, J.H. and Serret, M.D.: Leaf anatomical characteristics in <i>Flaveria trinervia</i> (C ₄), <i>Flaveria brownii</i> (C ₄ -like) and their F ₁ hybrid	49
Fenton, J.M. and Crofts, A.R.: Computer aided fluorescence imaging of photosynthetic systems: <i>Application of video imaging to the study of fluorescence induction in green plants and photosynthetic bacteria</i>	59
Corrigendum	67

CONTENTS Volume 26 No. 2 November 1990

Mini review

Newman, S.M. and Cattolico, R.A.: Ribulose biphosphate carboxylase in algae: synthesis, enzymology and evolution	69
--	----

Regular papers

Sorokin, E.M., Bobylev, G.S. and Molotkovsky, Y.G.: Artificial increase of the light-harvesting ability of photosynthetic units in isolated chloroplasts	87
Frank, H.A., Aldema, M.L., Parot, P.H. and Cogdell, R.J.: Absorption and linear dichroism spectroscopy at room and low temperatures of single crystals of the B800–850 light-harvesting complex from <i>Rhodospseudomonas acidophila</i> strain 10050	93
Vasil'ev, I.R., Komarov, A.I., Matorin, D.N., Verkhoturov, V.N. and Venediktov, P.S.: Two types of PS II centres as manifested by light saturation of delayed fluorescence from DCMU-treated chloroplasts	101
Tyystjärvi, E. and Aro, E.-M.: Temperature-dependent changes in Photosystem II heterogeneity support a cycle of Photosystem II during photoinhibition	109
Sandmann, G., Peleato, M.L., Fillat, M.F., Lázaro, M.C. and Gómez-Moreno, C.: Consequences of the iron-dependent formation of ferredoxin and flavodoxin on photosynthesis and nitrogen fixation on <i>Anabaena</i> strains	119

Technical communication

- Tyystjärvi, E. and Karunen, J.: A microcomputer program and fast analog to digital converter card for the analysis of fluorescence induction transients 127

Rapid communication

- Genty, B., Wonders, J. and Baker, N.R.: Non-photochemical quenching of F_0 in leaves is emission wavelength dependent: consequences for quenching analysis and its interpretation 133

Corrigendum: Volume 25: 39–48, 1990 141
